A quick message of safety from the Local Authority:

Dear all,

There have been numerous scams reported - but of particular note there are a number targeting vulnerable families claiming to be about the FSM vouchers - asking for personal details.

'There have been reports of calls from somebody claiming to be from Public Health England, asking residents if they had received their letter from the government and then asking if they have support from family and friends, etc. and trying to obtain personal details' – please remember to be vigilant with regards to personal details.

If you are unsure about such a call then please let us know via the school e-mail address.

Thanks
SLT
